PROSPECTING

A Proactive Sales Approach

1. Determine the profile of the types of consumers that would make your best customers.

2. Turn to the Demographic Summary and look for carrier routes that meet your profile.

FYI
I cross-referenced this number in the Polk City Directory® and found that 422-4242 belongs to Gary Wilson who lives at 809 S. 4th Street in Appleton. He owns his home and lives in a neighborhood with median home values of $68,000.

Gary's nearest neighbors are Bill & Edith Smithton, 803 S. 4th Street, phone #422-9021, & George & Mary Johnson, 815 S. 4th Street, phone #422-5104.

The Smithton's & Johnson's are both retired and own their homes and would be great prospects for lawn care services as well.

(Gary's wife's name is Ann).

DISINTEREST CURIOSITY INTEREST CONVICTION DESIRE ACTION

Before a prospect will **BUY**, they must mentally travel through **6** states of mind.
Get through to them with Repeating Billboard Advertising.

Take advantage of the power of PLANNED REPETITION with Repeating Billboard Ads.

With a repeating billboard ad, your company will be noticed again and again as users thumb through the Polk City Directory. Your ad will repeat throughout the Alphabetical and Street Guide sections.

Your ad is highly visible as it can appear on the top of the page, or on the outside edge of a page...**the choice is yours!**

DID YOU KNOW?
62% of all ideas are accepted only after they are presented for the **6th** time. How do we know planned repetition works?

Planned repetition worked in school.
Spelling — Reading — Multiplication Tables — Etc.
Planned repetition worked at home.
Tying Shoes — Nursery Rhymes — Personal Habits — Etc.
Use planned repetition for your business!

Without planned repetition, if you gave your idea to 100 people just one time...

1 day later...25% would not recollect.
2 days later...50% would not remember.
4 days later...85% would not recall.
7 days later...97% would have forgotten.

The most effective Polk City Directory® advertisers specify this popular service. **Ask your Polk City Directory® sales representative, or call us toll-free at 1-800-886-7075 to find out how you too can take advantage of the selling power of repeating billboard ads.**

"It could happen to you" scenario #5:

Stewart-Meadows Wedding
Ashley Stewart and James Meadows will be married on Saturday, June 3rd at 2:00 PM at the Farley Wedding Chapel in Greenspan.

St. James-Adams To Wed
Rebekkah St. James and Michael Adams to wed on Saturday, July 1st at 5:00 PM at the First United Chur[illegible] in [illegible]bany

While looking through the morning paper over breakfast, you notice a couple of wedding announcements. One of them says James Meadows and Ashley Stewart will be married on June 3rd. The other states Michael Adams and Rebekkah St. James will wed on July 1st. You realize a prime prospecting opportunity and jot down their names on a slip of paper to look up in your Polk City Directory® when you arrive at work.

At work you pull out the slip of paper and begin prospecting. Your business clientele is comprised mostly of men, so you will concentrate your efforts toward them. In the Alphabetical Section you look up Michael Adams first. You find that he lives at 109 Johnstone Ave in Apartment #1. In the M's you see that James Meadows lives at 1401 South Washington. You also notice he is a homeowner by the homeowner symbol (🏠).

With the complete mailing address you send a personalized greeting to each of them, congratulating them on their upcoming nuptials and offering your services to them. James calls you back a week later asking for more information on what you have to offer. Michael doesn't respond, but that's okay—you've also got his number in the Polk City Directory® and will follow up with a phone call.

Even if Michael is not interested in what you have to offer, at least you've established contact, plus you have a hot sales lead in James. The few minutes it took to gather this information with your Polk City Directory® will have long-lasting benefits.

Just the FAQ's about the Map Section

Answers to Frequently Asked Questions (FAQ's):

Will the street maps cover the entire geography of a directory?

Our goal is to provide street-level coverage for the entire geography of your directory, however there will be some instances where this goal is not met. Issues that will affect the extent of street level coverage include:

- Limitations of the street file database. In some rural areas, streets are not named in the database. Our cartographers will omit these areas from the Map Section.
- Coverage area is too large. We have established a maximum of 48 street-level map pages for a directory. In directories with very large coverage areas, outlying areas may be omitted from the Map Section.

Will features (cemetery, post office, etc.) be inclusive for the area?

The Map Section will illustrate the following features whenever they are in the mapping database:

- Highway and street, Railroad, U.S., State and County boundary
- Hospital, Cemetery, Government Facility, Post Office, Rail/Subway terminal
- Bus terminal, Retail Center, Golf course/country club, Park, Airport
- Point of Interest (ex. Empire State Building), Water (lake, river, etc.).
- College, Stadium (professional), amusement park, correctional or military facility

Why doesn't a certain street appear on a map?

Geography is constantly changing, and Geographic Data Technology (GDT), our Map Section provider uses a number of resources to keep up with those changes. GDT maintains relationships with more than 5,500 government agencies and private map producers to make sure it has the most current resources available. As part of its quality assurance process, GDT requires at least two sources to include new information in its product. Sometimes the resources GDT uses may not include a particular street, or GDT may not have had appropriate resources to verify the street's existence.

It looks like there's a line indicating a street but it does not include a name Why is this the case?

GDT may have been able to verify the existence of the street, but not the street name. (For example, the street may have come from a newly approved plat map that did not yet include street names.) GDT has added the street as an unnamed feature. Once the street name has been verified, GDT will include the street name.

Why should I use the POLK CITY DIRECTORY® Map Section rather than another map?

The Map Section is neatly bound inside your POLK CITY DIRECTORY, a reference tool that is already used in thousands of delivery and service vehicles around the country. Used in conjunction with the other sections of our directory, you can not only find your way around town efficiently, but have the wealth of information provided in the POLK CITY DIRECTORY with you as well.

"It could happen to you" scenario #4:

Your business has a delivery service, but in recent weeks you've observed a significant decrease in productivity. Bogus phone numbers and hard to find addresses are your two biggest problems. Your new Polk City Directory® recently arrived, and you realize it might help you solve these two problems.

The next day you decide to put it to the test. In the first hour you have three deliveries to make. You verify all three names, phone numbers and addresses in the Alphabetical Section. Since they are valid, you proceed to map out a delivery route.

How to use the Demographic Summary for sales prospecting

How can I find my best potential customers?

1. Establish the profile of your best potential customers.

   Individuals over 45 years old who have lived at the same residence for more than 10 years are most likely to buy my products. (Illustration only. You determine profiles based on your needs.)

2. Find out which carrier routes best meet your potential customer profile by searching for these characteristics in the Demographic Overview tables.

		Neighborhood Composition								
Zip Code	Carrier Route	Total Business Count	Total Household Count	Total Person Count	Household Age	Percent Households w/Children	Median Age Adults 18 and Over	Average Length of Residence	% Length of Residence 0-2 Years	% Length of Residence 10+ Years
49707	C001	257	401	1226	Retired	35	47	6	37	21

49707	C004	390	295	932	Middle	31	46	8	26	46

All the carrier routes meet the age profile, but C002 has the greatest percentage of individuals who have lived at the same address for more than 10 years .

3. Look at the Guide to Carrier Routes to identify all the neighborhoods in this Carrier Route. *In this example we are looking for C002.*

Just the FAQ's

Answers to Frequently Asked Questions (FAQ's):

How are streets listed in the directory?

The Street Guide lists streets in alphanumeric order with numbered streets appearing first.

Identical street names are listed alphabetically by town name. For example, 200 S Main St in Ann Arbor would appear before 200 S Main St in Chelsea.

Within a city, streets appear alphabetically beginning with the primary street name. For instance, Main St will appear before E Main St which is before N Main St and so on.

How do you list streets that are referred to in more than one way?

We adhere to postal service naming standards, so there will be instances where one side of the street has one name and the other side of the street has a different name.

What is a carrier route?

Carrier routes are one of the ways the postal service identifies a deliverable mail address. They are shown in the directory, whenever available, in the Street Guide.

Are unlisted phone numbers in the directory?

Unlisted phone numbers will not be provided. We respect the right of individuals to not have their phone number published. Furthermore, residents and businesses whose address information is unavailable *will not appear* in the Street Guide.

What if someone's mailing address is different than their physical address?

We standardize each address with U.S. Postal Service standards and list the physical address in the directory. Rural route numbers can be obtained from the carrier route information. Post office boxes are only used when no other physical address is available.

What if I do not want to be listed in the directory?

Polk Directories® takes an active role in ensuring the responsible use of consumer information and honors all requests from consumers who do not want to be included in the Polk City Directory®. Consumers who do not wish to
be listed can fill out and return the change of address form in the back of the directory, checking the box indicating that they do not want to be listed.

Where does the demographic information come from?

All demographic information is obtained from a variety of public and private data sources, including United States census figures. The information is adjusted quarterly based on several economic indicators.

Glossary of Demographic Terms

Demography is the study of human populations, including size, growth, density, distribution, and vital statistics. This information can be helpful in deciding where to locate a business, determining what content to include in an advertising message, or determining the best neighborhoods for distribution of your print advertising.

Zip Code -- The five-digit zip code for which demographic information is provided.

Carrier Route -- A group of addresses within a zip code for which demographic information is provided.

Total Business Count -- The total number of businesses in a group.

Total Household Count -- The total number of households in a group.

Total Person Count -- The total number of adults in a group.

Household Age -- The age category of adults 18 and older, that occurs most frequently for residents in a group. Values are defined as follows:

Value	Description
Young	18 to 34 years
Middle	35 to 54 years
Older	55 to 64 years
Retired	65+ years
Unknown	Unknown

Percent Households with Children -- Percent of households with children. If there are 1,000 households in a group and 55% have children, then 550 households in the group have children.

Median Age Adults 18 and Over -- Median age of adults 18 years and older. Half of the ages in the group are greater than the median age and half less than it.

Average Length of Residence -- Average length of residency. The average number of years a resident in a group has lived at the same address.

% Length of Residence 0 - 2 Years -- Percent of households who have appeared at their current address for two years or less.

% Length of Residence 10+ Years -- Percent of households who have appeared at their current address for ten years or longer.
